

The Sherlock Holmes Guide to Being a Great Problem Solver

7 December 2023; 9.00am – 5.00pm

Sherlock Holmes was a brilliant detective because he was a brilliant Problem Solver. Encompassing Critical Thinking, Objectivity, Scientific Thinking, Sense-Making and Logic, the literary character demonstrated a superior ability to solve problems both through his thinking and his practices. Sherlock Holmes stories were not only gripping and dramatic, they also included many clues and tips on how to effectively do Problem Solving. In this one-of-a-kind course, we will share with you the forgotten secrets of solving problems the Holmesian way, helping you achieve higher levels of improvement and performance in whatever you do.

TOPICS

1. Practical Problem Solving and Critical Thinking
2. The Criticality of Properly Identifying Problems
3. The Power of Great Analysis
4. Developing the Mindset and Practice of Experimentation
